Equipment
pot, soil, bean seed, water

Steps
1. Take the pot and
2. Put the soil in the
3. Pot and take the bean
4. Seed and put it in the
5. Pot and put water
6. In the pot

Grade Commentary

Bailey has demonstrated a sound understanding of the structure and features of a procedure. An attempt has been made to use numbers to indicate the sequence but the numbers do not match the commands. Action verbs have been used. Effective strategies have been used to spell most words but the text could be strengthened by the alignment of numbers and commands and the use of adverbial phrase.

Bailey’s response demonstrates characteristics of work typically produced by a student performing at a grade C standard.
