Grade Commentary

Rania has demonstrated a basic understanding of the structure and features of a procedure. Simple action verbs and commands have been used but adjectives and adverbial phrases have been not been included. A title and list of requirements have been provided. There is effective use of spelling strategies and the desktop publishing is adequate. To progress further, Rania could ensure that commands are used to begin each step and add more detail to ensure the procedure is clear enough to be followed.

Rania’s response demonstrates characteristics of work typically produced by a student performing at a grade D standard.
