Toucans.

The Toucans have a red yellow green and orange beak. Their faces are red yellow and all of the body is black, and they have a long tail.

Toucans are only found in South America on top of the canopy in a hollow tree.

Toucans also eat fruit and nuts. They used their beaks to cut the fruit from the trees.

Their only enemies are big cats eg. jaguar and wild cats.

Toucans can only live to 6 to 10 years old. The babies are hatched away from their nest.

The females can hatch to 2 or 4 babies a year. They could be heard for a mile away and they sound like a frog croaking.
The Toucans have a red, green and orange beak. Their faces are white to their stomach. Their whole body is black. They have a long tail.

The toucans are only found in South America. On top of the canopy in a hollow tree. Toucans eat fruit and nuts from the tree.

Their enemies are only big cats e.g. Jaguars and wild cats.

Toucans' life span is to 6-10 years. The females can only hatch 2-4 babies a year.

In 10 months time the babies will fly away and make their own nest.

Did you know that the Toucans could be heard for more than a mile away!

Grade Commentary

Jody has demonstrated basic knowledge and understanding of the structure and features of an information report. Simple descriptions with little technical language have been provided. Limited strategies have been used to spell words, punctuate and structure sentences. There is some evidence of editing and basic competence in desktop publishing skills but teacher guidance has been required to complete the activity.

Jody’s response demonstrates characteristics of work typically produced by a student performing at a grade D standard.
